THE HOUSE

Gold Petal Atelier

Kunming Gold Petal preserves the fleeting beauty of botanicals with quiet permanence. Fresh blooms and foliage are hand-pressed in Kunming's highland climate, then suspended between dual panes of clear glass within a slender champagne-gold floating frame — appearing to float in light.

The GP Rainbow Collection is not a cartoon spectrum. It is seven refined colour chapters — VIBGYOR as an elite palette for refined interiors worldwide — composed with generous negative space, farm-direct Kunming botanicals, and materials that can be pressed, sealed, and shipped with integrity.

Every frame follows one language: slim champagne-gold metal, UV-minded glass, sealed edges, and compositions arranged in crescent, L, or S-curve — the Gold Petal signature.
